# APOORV SHARMA

Web Developer & AI Builder | B.Tech CSE (2024-2028), JKLU
Email: sharma2006apoorv@gmail.com | LinkedIn: linkedin.com/in/apoorvsh001 | Portfolio: apoorvsh.netlify.app

## PROFESSIONAL SUMMARY

Forward-thinking Full Stack Web Developer and AI Builder with proven experience building MERN stack applications, SaaS platforms, and Agentic AI workflows. Founder of Webnetic Studios and Co-Founder of FuseOne Studios. Published author with a strong focus on scalable system architecture, clean UI/UX, and business automation.

## EDUCATION

**JK Lakshmipat University, Jaipur**
*Bachelor of Engineering (B.E.) in Computer Science* | *Aug 2024 - Jul 2028*
Relevant Coursework: Data Structures, Web Development, Object-Oriented Programming, Database Systems

## TECHNICAL SKILLS

**Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Three.js, Framer Motion
**Backend & DB:** Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT Auth, System Design
**AI & Automation:** Agentic AI, Multi-Agent Workflows, LLM Integrations, API Automation
**Tools & Platforms:** Git, GitHub, Docker, Postman, Vite, Vercel, Render, Linux, Figma

## EXPERIENCE

**Founder & Full Stack Lead - Webnetic Studios** (Jan 2022 - Present)
- Built modern, responsive, SEO-optimized web applications and SaaS platforms for clients across diverse industries.
- Engineered scalable full-stack architectures combining clean React frontends with robust Node/Express/MongoDB APIs.
- Helped businesses automate repetitive workflows and improve conversions through tailored digital systems.

**Co-Founder - FuseOne Studios** (Jan 2025 - Present)
- Architected Agentic AI-driven platforms focused on automating business workflows and operational efficiency.
- Designed multi-agent AI execution pipelines reducing manual tasks by up to 70% in target processes.
- Managed product roadmap, UI/UX interaction systems, and API integrations.

**MERN Stack Developer (Intern) - Codec Technologies India** (May 2026 - Jul 2026)
- Developed RESTful services and modular React components for enterprise client applications.
- Collaborated on database schema design with Mongoose and implemented secure authentication flows.

**Open Source Contributor - GirlScript Summer of Code (GSSoC)** (Sep 2025 - Nov 2025)
- Contributed feature enhancements, bug fixes, and performance optimizations to national-level open source repositories.

## PUBLICATIONS & CERTIFICATIONS

- Author of published book: "A Guide to Resisting Peer Pressure" (Mindset, decision-making, and youth leadership)
- Red Hat System Administration I (RH124 - RHA)
- What Is Generative AI? - Foundational certification
- Online Dispute Resolution (ODR) Mechanism certification
